### The Efergy Smart Electricity Meter Introduced

Audio and Peripherals | Just Announced

Mon 22 Dec 2008

digg this slashdot this

**Manila, Philippines** -- Efergy tells you every 6 seconds how much power you are consuming, how much money this is costing you and an estimate of your personal contribution to the climate change. If you turn a set of lights ON or OFF, you can see INSTANTLY the change this has to your energy use. Once you have this information to hand means you, your family, or business, can visually see the benefits of saving energy.

The data is stored daily in an easy to access CPU memory so you can actually see the effects of your changing energy habits. Comparing day-to-day usage gives you direct feedback of how daily changes of habit toward energy use can have an effect on costs and estimates the personal contribution to the climate change in terms of carbon emissions.

The Efergy meter is an excellent educational device. It is easy to use, displays personal energy consumption and increases awareness of important issues related to electricity, energy and the environment.

EFERGY E-lite SRP Price - Php 7,000. For more information, please call Federal Hardware at (632) 893-1654 or visit [www.efergy.com](http://www.efergy.com)
